## RISE

*Rise* is a unique collection of exotic noise special effects designed to **create movement and energy in music, broadcast and game production.**

Music producers and DJs will find this library dedicated to the shared concept that moves modern dance music - the building of tension and release through the use of differing types of atonal noise. *Rise* provides a superior soundset of 540 cutting-edge noise FX, which you can use individually, or mix together to generate **spine-tingling dynamics** in your tracks and mixes.

The CD-quality, 44.1 khz / 24 bit samples have been also **built with sound designers in mind**, who will find the CD-quality WAVs indispensable for adding **unique transitional FX to broadcast and game audio.**

Develop intricate drops and crescendos, motions, explosions, collapses and ascensions with drag and drop simplicity. *Rise* is the easy way to form **professional-sounding, complex noise elements** in your productions or sets: guaranteed to add new dimensions to your audio.

### Ableton Live pack (compatible with Live 7.0.1+)

The *Rise* Ableton Live pack gives you complete control over all the *Rise* elements: as well as the 540 standard Clips, the pack contains 560 sample-based FX racks with macro assignments that allow you to **manipulate the movement and evolution of each individual sound.**

Think of the *Rise* Live pack as your personal noise orchestra: you have the ability to shape any of the FX into new forms with the racks, or play the velocity / filter sensitive noise samplers like instruments. Easy reversing, pitch modulation, and 'sampled section' playback control means you can **morph each sound in new ways**, quickly creating something new from the original part.

A whole batch of multi-mix sampler FX racks is also included for mixing and arranging hundreds of elements on the fly, plus you get a complete selection of add-on FX racks to **hone the acoustics even further**, whilst still retaining full macro management on each part.
