

Save £5 Now! buy this pack as part of our [Drum Machines 01](#) bundle.

AirBase Drums is the first in an ongoing line of products to be released through **Wave Alchemy's** new Micro Pack catalogue. Offering over 480 samples from the highly praised Jomox AIRBase99 and MBase 11 drum machines, AirBase Drums is a must have collection for anyone wanting to expand their drum-hit library with authentic analogue drum samples.

As with [Electrik Drums](#), all samples have been beautifully recorded through an API 512c pre-amp with a small selection of the sounds being sonically enhanced through the use of an Empirical Labs Distressor and high-end SSL equalizers.

This product is suitable for use in any genre of electronic music and would be an excellent addition to any producer's arsenal.

What's included in the sample pack?

- 482 24-bit 100% royalty free AIRBase99 and MBase 11 samples
- 128 AIRBase99 kick drums
- 245 MBase11 kick drums
- 41 clap & snare drum samples
- 52 hi-hats and toms
- 16 percussion & crash cymbal samples

At Wave Alchemy we don't compromise on quality and use only high end equipment ensuring everything is recorded in 24bit through high quality A/D converters.

Kit List:

- Jomox AIRBase99
- Jomox MBase 11
- API 512c pre-amp
- Empirical Labs Distressor EL8
- SSL E Series EQ
- SSL E Series Compressor
