TRIBAL TECH

Tribal Tech blends the ancient rhythms of the world's indigenous cultures with **future audio processing** to create a **truly original House-tempo groove library**.

This exceptional, royalty-free collection features 330 interlocking House percussion and FX loops that can be seamlessly fused to **create literally thousands of tribal-orientated rhythmic progressions**.

Utilising **drums and percussion instruments from every continent**, combined with special effects from another planet, *Tribal Tech* has been designed to bridge the gap between nature and machine.

The extremely versatile content gives you freedom to create in a huge number of ways: take a couple of minimal elements to form a base groove for your track, or layer, level and pan multiple loops to **generate a unique drumming circle in seconds...** the choice is yours.

As standard with a *Push Button Bang* music release, all loops are high quality 24 bit. They come kick-free at a multi-genre friendly 128 BPM, with both WAV and REX formats packaged together.

Blurring the lines between played and processed, past and present, *Tribal Tech* will **ignite your rhythmic journeys** into future-flavoured tribal house and beyond.

PUSH BUTTON BANG
