## Dirty Tech House

Dirty Tech House is a huge loop-based tool designed for Minimal & Tech based House music. The library consists 1,2 gigabytes of amazing basslines, synths, chords, construction loops, electro breaks & percussions, glitches, fragmented voices and everything you need to build a complete track. Dirty Tech House is based on a new, fresh and useful design concept called "FX layering": each loop has its special FX version which can be used by itself or mixed with the original source in order to obtain mutant and rich sequences.

In addition to the 670 WAV loops, the library contains also 670 REX2 loops, 670 Live Drum Racks and 670 Kontakt 4 Instruments that drastically increase its sound potential and customization. The Kontakt Instruments are based on Kontakt 4 KSP engine and thanks to their intuitive and useful user interfaces you can directly control lot of parameters in few clicks and store your own patches. These instruments can be used as loops or can be played as instruments with your keyboard. The Live Drum Racks come with special built-in effects/parameters and dedicated MIDI clips. Simply try to change the MIDI sequence and to move the knobs and you will obtain completely new loops with a special granular taste.

All the included material is based on 24bit native WAV format, is meticulously edited and recorded and filtered with top class analog & digital machines. Dirty Tech House is a powerful, huge, useful and ultra-customizable loop library and an all-in-one professional tool for Minimal & Tech House music productions.
