Club Life

The "Nord Modular G2 series - Vol. 01. - CLUB LIFE" is a set of magnificent multi-sampled and categorized instruments, using all the great features of your software sampler. Shaking basses, dark pads and swirling arpeggios, cutting-edge leads are all there to add a distinctive character, to make your mind blow and your productions shine!

The focus of this unique heavyweight DJ samples compilation was to create sampler presets that could rock the dancefloor by matching them with our descriptive musical attributes like "sizzling, warm, sharp, nasal, fat, emotional", and not to overuse "hard-trance"-esque sounds.

With its dense and evolving esoteric layered landscapes makes this compilation also suitable for film and post-production works, but its primary usage is for music production in trance, dance, pop, house, techno, electro, psy, ambient etc. genres.

Club Life is a set of multisamples of our custom sounds for the Clavia Nord Modular G2 synthesizer. Clavia Nord Modular G2 is the ultimate synthesizer for creating unique synthesizer sounds. From the original classic analog sounds to any bizarre "sci-fi" drone texture the G2 offers a number of previously unavailable sonic opportunities. Despite its bizarre complexity this instrument is the "secret weapon" of several famous top producers' and musicians' technical arsenal around the world.

The sound designers of Wavescapes Studio spent lots of time just for creating G2 sounds that really works, then recorded and processed these sounds as multisamples in 24 bit format. Sampler presets are carefully keymapped, programmed and fine-tuned using all relevant software sampler parameters (including DCA, DCF, LFO, modulation matrix, glide, etc.) manually.

Realtime control possibilities are also added, just move the modulation wheel to change several parameters in real-time in order to make the sounds "breathe"!

Sampler presets in this pack went through a multiple selection process, so over a hundred real club sounds were selected from the thousands. Some of them contain massive layers creating really FAT sounds - just check the XTRA category! We categorized each preset into ARP, BASS, LEAD, PAD, XTRA categories for easier identification while looking for the right DJ samples for your song in the making.
