

## SP1200 Vol 1

Formats: Wav Reason Refill Battery

Genres : Breaks Drum and Bass Drums Electro Electronica Glitch  
Hip-Hop House Techno

What do 12 bit drum samples sound like when put through an analogue filter. If you have a SP-1200 or SP-12 then you already know the answer. Some would say dirty and warm, some also say it sounds like old vinyl... The SP-1200 is a legendary drum sampler. Used by many artists from Roni Size to Daft Punk. Hip Hop legends Pete Rock and J Dilla were also notable users. Not everyone can get their hands on one of these machines. So I thought I better help out. I got the SP-1200 and the SP-12 and started sampling. I sampled an 808, 909, 606 and LM1... also some real drums... plus some vinyl hits... and just for good measure I have included the SP-12 presets and some groove templates... Get yourself some warm dirt!

Tech Specs: Over 1000 Samples recorded directly into the Classic Roland SP1200 including:

31 Beatbox samples

25 606 Samples

218 808 Samples

102 909 Samples
