Fusing styles of electro, progressive and minimal house, the new Wave Alchemy sample pack Electro House Progressions offers over 500mb of cutting-edge 24bit material, expertly produced using a wide range of new and vintage analogue equipment.

As well as an excellent standalone product in its own right, this library is designed to work as an accompaniment to our hugely successful first release, Electro House Underground. The combined content of Electro House Underground and Electro House Progressions gives you access to a huge and ultimately complete collection of inspirational royalty free electro, progressive and minimal samples, influenced by the current underground dance music scene and its leading producers. What's included in the pack? Blistering analogue basses, essential minimal stabs, crusty vintage synth loops and frantic minimal drum loop bliss. Original Roland TB-303 loops, crispy top loops, live percussion loops, sizzling synth FX and over 200 original drum hits and glitch percussion. At Wave Alchemy we don't compromise on quality and use only high end equipment ensuring everything is recorded in 24bit through high quality A/D converters.

Tech Specs:

- 596 Wav Samples
- 108 Minimal/Progressive Drumloops
- 75 Blistering Bass Loops
