All of the samples and loops, a total of over 2200 .WAV and over 960 REX2 files, are intelligently grouped. Tool-Box-PacsSamples, loops, rex2 loops, drums, etc. All mixed/sorted for you to get things started fast. Loads of MPC & turntable phrases, bass riffs, horns, flutes, guitar licks, beats and & breaks.

Drum-Loop-PacsEvery loop in three different versions: the MPC programmed loop, the full loop and the live break. All versions can be used separately or you can build your own version/mix by layering the MPC with the Break - in perfect sync! But things to not stop here: also provided are the separate elements in every Drum-Loop-Pac: the kick loop, the snare loop, the hihat loop, the break loop, etc. All to help you mix, EQ & compress it all to your own personal compound.
