Electro House Minimal House Tech House Progressive House

Awards : Computer Music 10 out of 10

Dark house is a focused collection of loops, special fx and rythm single hits for house styles with a darker edge. Whether you want to drag and drop and just "have it work", or you want to warp and mutate the sound into submission, all the building blocks are lurking here ready to burst out of your sequencer and onto the dancefloor. From sparse Minimal Tech to dirty Justice-style Electro, Dark House has all the sounds you need create your perfect production.

The loops section is divided into three main catagories, with various subfolders in each. The drum and rhythm sections features several loop component sub-catagories, kick, snap, percussion, top sections and general pre-processed loops.

The fx section contains build parts, noise pumps, and general FX rhythms ranging from build automations to collapsing cut sequences.

The instument section contains a wide array of processed synth lines that can twist, slide and stutter any way you want.

The single hit section contains around 500 hand crafted rhythm elements, solid bassdrums, wide snaps and claps, toms, bleeps and minimal rhythmic elements covering a wide range of possibilities.

As well as the loops and single hits, the collection also features a comprehensive build and transition FX section. This enables you to create your unique noise build and exit, whether subtle, massive, quick or slow, in just a few clicks of the mouse.

If you want your house music to pump, bite and shake up the dancefloor, Dark House will supply you with all the tools you need.

DARK HOUSE LIVE PACK (COMPATIBLE WITH LIVE 7.0.1 +)

All of the content has been placed into custom racks to offer the maximum flexibility for the content within live.

As well as the standard clip versions, the loop sections have been allocated into pre-cut drum racks with a variety of standard macro assignments, offering even more ability to customise and shape the sound from the first step.

The FX section sounds have been placed into single instrument FX racks with added macro assignments.

The drum single hits section has been carefully assigned into 55 banging impulse kits, guaranteed to provide a dancefloor-friendly, solid rhythmic base for your track.

As well as all the above, the collection contains a large number of sampler multipatches, with all of the single hits and FX laid out in order and in multiple pitches, so you can quickly mix and match many patches together.

Dark House is focused, flexible, user-friendly and will supply you with a highly remixable sound palette for your house productions for years to come.
