

## Broken Rules Hardcore Tekno

Formats: Wav Rex2

Genres : Techno Hard Dance

In 1991 Industrial Strength released the first Hardcore Tekno tracks in the world. So we are proud to present the sound that put us on the forefront of cutting edge electronic music in one sample pack.

This is a unique and one of a kind sample pack that will offer the true sound of Industrial Strength Records. This exciting sound source offers mind blowing loops, distorted kicks, freaked out synths & dry one shot hits that are the key elements in making Industrial Tekno & Industrial Hardcore.

The pack contains perfectly cut Rex files, wild FX loops, and distorted madness to charge up your productions. This stunning pack is produced by David Flores aka Broken Rules. As one of ISR main featured artists it seemed only fitting to have him unleash the first attack on your sample collection.

Broken Rules has been mashing sounds, and designing hardcore textures since 2000. This sample pack contains all you need to make Hardcore Tekno with the most authentic sounds, FX, and loops from this L.A. based music producer.

Broken Rules utilized the hottest software and analog gear he has collected over the years to provide you with an inside view of the real I.S.R. sound which goes beyond any other style of electronic music. If you're looking to take your music to the edge and back, no question - this pack is for you.

In his feverish pursuit to produce and create the most devastating sounds for this ISR pack, we took the pack to the next level by adding four unique 24 Bit Flexi Traxx which are all Ableton Live ready.

The Flexi Traxx can be used in conjunction with the sounds, FX, hits, and loops provided in the pack to use in Ableton Live, taking the creative experience with a sample pack to new levels not seen in other packs.

Also included as a extra bonus are 5 Demo clips all in 16 Bit WAV format for extra power while using Live. Now you can mix the Flexi Traxx, demo loops, FX loops, and all the sounds in this pack together to create new music on fly while DJing. The possibilities are endless.

Alone the Flexi Traxx can be used as musical beds in which to create new trax in the studio much like construction kits. The Flexi Traxx can also be mixed and matched to make even more variations while exploring your electronic DJ skills on Ableton Live !

You have complete control whether playing out, or in the studio. Industrial Strength is committed to pushing the envelope with our user based products with more packs in this new Industrial Strength

format.
