

Vintage Breaks - Drum and Bass Dubstep Pack

Formats: Wav Acid Rex2 Apple Loops

Genres : Drum and Bass Drums Dubstep Bassline Dub Breakbeat Breaks

These are samples taken from ISR's Vintage Breaks Volume One. So if you already own the Vintage Breaks sample pack then you don't need this pack !

If you don't own the pack, this is a broken down version. The pack contains all the Drum and Bass loops folders, Dub Step and One Hits from Vintage Breaks Volume One.

Inspired by the almighty Amen break and many other drum breaks. Industrial Strength's Vintage Breaks is a must have for any DnB, Funky Breaks, Dub Step and electronic music producer.

This unique Industrial Strength pack dives deep into the needs of the modern music producer. With 246 original license free samples this will be your go to source for Vintage Drum n Bass and Dub Step breaks.

All the loops were performed live by New York drummer Evan Pazner. The loops were made using a late 1960's Ludwig drum kit similar to the kit used in the famous Amen break.

This pack contains all you need to produce the hottest drum tracks in any style with out having to dig into record crates and take breaks from old recorded music to get that true vintage sound in your production.

The loops were created in various Dub Step and Drum n Bass tempos and formats to meet the needs of any Drum n Bass or Dub Step producer. This version of Vintage Breaks contains Apple Loops, Rex 2, Acidized Wav as well as one shots to create your own patterns.

The pack was produced and recorded by Lenny Dee and Derek Nievergelt at the Tight Spot Studios in Brooklyn New York. The drum loops and samples were recored at 24 Bit 44.1 k. in Pro Tools HD.

The breaks were edited, reworked and mixed by BHK. All the loops he created are perfectly cut and reworked into authentic sounding D-n-B grooves that are totally usable in today's modern DnB production.

All the drums were recorded in a dead room to limit the room reflections and standing waves giving you more flexibility when using the breaks in your track. Various microphones and vintage pre amps were used in each recording to give you that old school record style feeling with out compromising on the quality of the drum sounds and loops.

If you're looking for that kicking old school Drum n Bass or classic Dub Step break and don't want to worry about sampling a record and running into copyright issues, then this sample pack is the perfect solution for your production needs.
