Electro House consistently fills the dancefloors of the superclubs of the world and this collection of brand new and up to the minute underground samples from Wave Alchemy is packed with all the latest ingredients any underground house producer will require to make the next generation of floor filling club anthems.

Electro House Underground features a huge palette of sounds and samples which reflect an acknowledgement of the development of the Electro House Scene over the last two years, and then moves things forward with more minimal textures, ambiences, twisted basses, lush pads, tech fx, heavy gated drums and percussion, and a huge selection of single hits alongside the loops so you can build your tracks from the underground upwards. The Synths are tearing and will cut through the noise with unprecedented texture and ambience whilst the basses have just the right amount of bottom end to shake the speaker system of any club mainroom. Drums include huge beefy kicks, crisp percussion and cracking snares which when combined will fill the dancefloor in seconds. The FX samples will melt effortlessly into your music and there are plenty of filtered and toppy loops which merge together to make a unique and addictive backbeat to any breakdowns or for more minimal moments.

Please Note: When selecting the appropriate download version for your requirements the Zip (Full) format includes Acidised Wav and Rex2 Loops – all single (non looping) sounds and Sampler Patches for all compatible soft samplers listed. Reason Refill and Ableton Live Packs contain all the samples from the collection, inc loops and single sounds. If in doubt we recommend you purchase the Zip(full) format.
